DOORS AND WINDOWS

NEW SOHO AND CONTEMPORARY
STYLES NOW AVAILABLE

The Window Collection

Introducing the Origin Window Collection...

It's your world, let's frame it

A suite of the finest quality products, thoughtfully designed and expertly manufactured in Great Britain by Origin

An integral part of this collection is the Origin Window, which now features three exceptional options: the OW-70 Slimline, the OW-70 Soho, and the OW-80 Premium. Each window is stunningly designed and meticulously finished, with unique features to complement any home.

All our windows are fully bespoke, thanks to our flexible production process that puts the power of customisation in your hands. From size and style to colour and hardware, your window will be tailored perfectly to your needs. And with uncompromising security features seen across all models, your home stays safe no matter which window you choose.

Like every Origin product, our Windows are guaranteed for up to 20-years on parts* — so you can relax, knowing your investment will stand the test of time.

The Slimline Window

Beautiful, elegant, and minimalist, the OW-70 Slimline is designed for spaces where maximising glass and light is essential. Crafted from high-grade aluminium with a slender 65mm frame, this window combines ultra-slim sightlines with remarkable strength — delivering both style and security.

The Premium Window

Modernising the design of traditional 19th Century timber windows, the OW-80 Premium Window is a robust, highly durable solution for the 21st Century. On top of featuring an exquisite internal and external flush casement, it also offers exceptional thermal performance and is available in vast maximum sizes.

**Visit origin-global.com for our full Terms and Conditions.*

The Soho Window

Bringing a sleek, steel-style design to your home, the Soho Window perfectly balances industrial elegance with modern sophistication. With customisable true glazing divides, it can elevate any architectural setting and make a true design statement.

Here at Origin, our vision is to *transform the way families enjoy their home – from inside to out*

Colour you happy...

Both the OW-70 and OW-80 can be manufactured in over 150 RAL colours, covering everything from the wild and wonderful to timeless classics.

Whether you lean towards subtle shades or bold tones, there's a colour to suit every Origin Home. Many colours are also available in a matt, satin, or gloss finish, so you can achieve your perfect look.

For added flexibility, both systems offer a dual colour option - allowing you to complement the exterior architecture while tailoring the interior frame to your décor.

What truly elevates our colour offering is our in-house powder coating facility in Bicester. While most suppliers use 5-7 pre-treatment stages, we go through 10, ensuring the aluminium is perfectly primed. This results in a smooth, flawless finish that's highly durable and resistant to the elements, with unmatched consistency and visual quality.

Your windows when you want them...

As with everything Origin, lead times are built around you. When choosing from our popular colour range, you simply tell us when you want your windows delivered — be it a day, a week, or a month's time, and we'll deliver.*

Our most popular shades span from Hipca White to Jet Black, including a wide range of sleek metallics. The OW-80 also offers two authentic woodgrain finishes, giving you the look of timber without the maintenance.

**Delivery will be made to your chosen Partner and their availability will dictate your installation date.*

Bespoke to you...

Your window, your way

At Origin, we believe that the creation and manufacture of your windows is a very personal experience - it's an expression of who you are in style, practicality and functionality. So that's why every element of our windows are personalisable and tailored to you.

Working with your chosen Partner, specify your overall size, your desired configuration that works for your home, your colour scheme and handle choice, and if instructed by you, they will direct us to manufacture your windows to help make your home the best it can be.

From the smallest spaces through to grand mass coverings, we've done it all.

E. Natural Oak and Golden Oak	Light Oak

Built to last...

We recognise that every home is unique, and that's why each window is skilfully designed, specially tailored and hand crafted by us.

By combining a premium grade aluminium with precision engineering and exceptional craftsmanship, Origin have a proven track record in delivering high quality, functional and stylish products that are built to last.

Manufactured and assembled in Origin's Buckinghamshire based factory, all of our windows face rigorous quality testing at each stage of the manufacturing process to ensure that every window leaves at a consistently high standard.

We have complete control of every product – from sourcing through to manufacturing and delivery, and only use the highest quality materials and components in the process.

Our unfaltering stance on quality control in all operations enables us to be proud to offer an incredible guarantee of up to 20-years on parts, for absolute peace of mind.*

See page 31 for more information on our quality accreditations.

Safety first...

As well as looking stunning, the Origin Window collection is highly functional in satisfying Building Regulations for emergency exits, restricted openings and marine based dwellings.

Side and top hung windows can be designed to serve as an emergency exit window by meeting the minimum width and height required to comply with British Building Regulations.

They can also be specified with discreetly designed trickle vents that either sit inside the sash or frame for additional ventilation in required rooms.

Plus, an optional restrictor hook prevents the window opening any further than a pre-set angle, giving your property an added layer of safety and security.

Both top and side hung windows can be designed to serve as emergency exits

Why aluminium?

Frame strength is a very important factor to consider when looking to invest in a window system.

Aluminium is Origin's material of choice because of its strength and durability - achieving these properties while weighing 67% less than steel. This means that the frames are highly resistant to flexing, warping or corroding in variable weather conditions.

Additionally, another reason for aluminium being Origin's material of choice is because it's infinitely recyclable.

Our aluminium requires minimal maintenance* and combines seamlessly with the bespoke thermal break to provide unrivalled energy efficiency.

All of these attributes make it the perfect material for creating visually exquisite, easy to operate and highly secure windows.

Read more about our environmental accreditations on page 33.

**More routine maintenance will be required in certain areas.
Visit origin-global.com for full Terms and Conditions.*

Enhanced security features...

Sophisticated style and elegance blends with the very latest in precision engineered locking mechanisms to make the OW-70 and OW-80 two ultra-secure systems.

Like our aluminium, our hinges are also made from the highest quality of materials and are capable of carrying exceptionally heavy loads, exceeding above and beyond the standardised 50,000 cycle test required for residential windows.

Both systems also feature a night vent function, enabling the window to be slightly open whilst in the locked position, allowing air to come through and not be compromised on security.

Hinge guards are installed as standard on all Origin Windows, and they are used to serve the purpose of protecting the hinges as well as blocking intruders from jemmying the window open along the hinged side.

Other features such as our industry-renowned locking systems, impenetrable crimped frames and locking handles help make the Origin Windows two of the most secure on the market.

Product displayed: OW-70 Casement
Colour shown: Hipca White - 9910G

Security accreditations...

Both the OW-70 and OW-80 comply with PAS 24, which is the recognised standard for doors and windows manufactured in the UK.

This means that your window has been thoroughly examined and tested to make sure it's fit for purpose in any property, whether that's in an existing structure, renovation or new build.

Additionally, both systems are accredited in line with the police preferred Secured by Design security regulations for extra peace of mind.

Both the OW-70 and OW-80 are PAS 24 compliant and Secured by Design accredited

See page 30 for more details.

Unfaltering security...

Here at Origin, your home's security and safety is a priority for us. It's an essential part of any product design, and this is certainly the case with the OW-70.

The Origin Slimline Window has been designed to keep your home safe and protected by meeting stringent PAS 24 security regulations and by being Secured by Design accredited.

Therefore, with our ultra-secure Nemesis multi-point lock, you can rest easy knowing you're in good hands.

The lock itself has been tested to BS EN 1670:2007 Grade 4, which measures resistance against spray salt corrosion. Featuring bi-directional technology with adjustable locking cams, compression is improved, which ensures a superior weather rating. Working in conjunction with a slim offset gearbox, the Nemesis lock ensures a smooth operation and long-term durability.

Read more about Secured by Design on page 30.

The OW-70 is PAS 24 compliant and Secured by Design accredited

The Encloser...

Attention to design is matched by high levels of security, as every OW-80 is installed with Yale's highly renowned and dependable Encloser Lock.

Just like the OW-70, it features innovative bi-directional locking technology. The OW-80 is able to offer supreme security, long-term reliability and a flawless performance.

The Yale Encloser works by engaging cylindrical cams into a zinc alloy keep, which when locked, compressed and engaged, will not only provide an extremely dependable system, but will also provide optimal weather proofing, ensuring that your home is safe from intruders and elements alike.

Each individual cam is adjustable and finely tuned in-house so that the compression against the keep is tight, all while ensuring that the operation of the window itself is smooth.

Like the OW-70, the OW-80 exceeds the regulations required for PAS 24 and is Secured by Design accredited, ensuring you of optimum peace of mind.

OW-70 handle options...

Like the window, the handles are made from aluminium, but also feature a Hardex Electro finish for complete durability. Therefore, with the OW-70, you're guaranteed of a handle that offers flawless operation, outstanding quality and an exceptional finish.

The stylish inline handle is available in a variety of colours as well as metallic shades, or for a colour-coded finish, our offset handle (used on the OW-80) can help create a unique look.

External flush casement...

The OW-70 is simplistic in style, featuring an external flush casement that instantly enhances your home's look and feel. Its ultra-slim 65mm profile creates a clean, elegant finish without bulky overlapping frames, adding character to any property - whether an ultra-modern new build or a traditional townhouse.

Thanks to aluminium's innate strength, the OW-70 offers impressively slim sightlines without compromising security. With the frame edge as little as 38.5mm from the glass, you get less window and more light, creating bright, open spaces. It's effortless, uncomplicated, and sleek.

The Soho Window shares this external flush casement design, but introduces a distinctive steel-style aesthetic with its true glazing divides and square beading.

Product displayed: OW-70 Casement
Colour shown: Hipca White - 9910G

Internal and external flush casement...

Stunningly designed,
brilliantly executed

Remarkable design and expert manufacturing techniques are built into Origin's DNA.

Smart and clean in appearance, the sash sits neatly inside the window frame, creating an industry-first internal and external flush casement.

With no overlapping frames, often synonymous with windows, the flush casement comes together to create a truly timeless finish. All that remains is a sleek shadow line where the sash meets the frame.

The clean finish of the OW-80 therefore provides unbeatable versatility that lends itself perfectly to any property type, from traditional townhouses, new builds and apartments, through to projects under strict planning regulations in conservation areas.

It's elegant, simple and
completely unique

OW-70

Designed and developed
for the UK climate

Product displayed: OW-70 Casement
Colour shown: Anthracite Grey - 7016M

OW-70 thermal efficiency...

With an overall U-Value of 1.2 when using triple glazing, the Origin Slimline Window comfortably exceeds UK building regulations requirements for thermal efficiency, so you can relax knowing you'll benefit from excellent energy efficiency and subsequently, reduced utility bills.

Despite its ultra-slim profile, every window has a polyamide thermal break and a bespoke cavity gasket, which limits airflow through the system and improves thermal efficiency.

Our expert and in-house R & D team are aware that the British climate can be somewhat unpredictable, so have developed a window system that meets the demands of the UK market.

Therefore, the OW-70 is sure to keep the cold out and warmth in during the winter months and vice versa during the summer, so you can stay comfortable in your home all year round.

OW-80 thermal efficiency...

Featuring an advanced triple weather seal that achieved unrivalled weather testing results, the OW-80 ensures that the elements are kept outside and that energy bills stay low.

The OW-80 is fitted as standard with a bespoke thermal break that drastically reduces air flow through the system. The net result is a phenomenally thermally efficient window.

The Origin Premium Window has been designed to keep a home warm when it's chilly and cool when it's hot

A large background image of an astronaut in a white spacesuit floating in space. In the background, a space shuttle is visible against a starry sky.

Upgrade to the revolutionary Aerogel...

Aerogel – thermal performance that's out of this world...

Introducing Aerogel – it's not only used to insulate space shuttles and spacesuits, but now, also your home thanks to Origin, enabling a phenomenal thermal efficiency to be achieved.

As the world's best insulator, Aerogel has the lowest thermal conductivity of any known solid material. Composed of up to 99.89% air by volume, the super-insulating silica Aerogel can be used in the thermal break of the OW-80 to considerably limit the heat transfer from one environment to another, allowing an astonishing 0.8 U-Value* to be achieved.

This revolutionary hydrophobic insulator is not affected by moisture or age, and provides major energy savings for the life of a home. A single 10mm thickness of this space age technology increases the insulation factor by up to 67%. When using Aerogel and the OW-80 together, the pair combine to deliver an incredible A Energy Rating.

If Aerogel has been designed to keep astronauts warm, just think what it could do for your home.

Aerogel allows the Origin Premium Window to achieve an astonishing certified U-Value of 0.8*

**Based on using triple glazing.*

OW-70 window types...

Casement

The OW-70 casement window can feature left, right or top openers. Because everything we do is bespoke, we can manufacture your window in a configuration that works for your home. This can include a combination of different openers and fixed frames, and thanks to an ultra-slim aluminium profile, you can be assured of the best view of the world outside your window.

Colour shown: Hipca White - 9910G

Picture / Fixed frame

With no mechanical or moving parts, the picture window can accommodate larger glass expanses with a further reduced frame width of just 38.5mm. Offering a completely unobstructed view, it allows an abundance of natural light to flood into your home.

What's more, because the window is fixed, there's minimal maintenance that's required.*

**More routine maintenance will be required in certain areas.
Visit origin-global.com for full Terms and Conditions.*

Colour shown: Dark Silver Metallic - 9007M

Bay

The bay window – proud and projecting by nature – is contrasted beautifully with the slim profile of the OW-70 window.

The OW-70 bay window adds an extra dimension to your room, making it feel larger whilst allowing in more natural light in the process.

Colour shown: Hipca White - 9910M

Soho

The Soho Window brings a sleek, steel-style design to your home. With an external flush casement and slim sightlines, every view is framed with industrial elegance.

Its design features carefully crafted detailing and square beading for an authentic and sophisticated appearance.

Colour shown: Jet Black - 9005M

OW-80 window types...

Product displayed: OW-80 Casement
Colour shown: Jet Black - 9005M

Casement

Casement windows are available with top or side openers and dummy sashes (meaning that the sash doesn't open, but it matches the style and sightlines of those that do).

The flexibility of our manufacturing techniques and bespoke nature of Origin products means that windows can be made in different shapes, sizes and proportions, to ensure they work for your spatial and practical requirements. For larger apertures, windows can be coupled together to allow for more light without compromising on strength and security.

Colour shown: Slate Grey - 7015M

Picture / Fixed frame

Picture windows are a simple, clean solution for windows that are not required to open or ventilate. Picturesque over a large aperture, they are a stylish way to get large amounts of light into a property.

As this window type doesn't include an opening element, it means that sightlines can be even slimmer, without conceding on any structural rigidity and security, and allows your window to be made up to a hugely impressive 7m².

Colour shown: Dark Silver Metallic - 9007M

Bay

Because all elements of the OW-80 are bespoke, it means the options are vast when specifying a bay. Indicate the quantity of windows, their size, the ones you want to open, the angles between them and the colour scheme, and allow us to create a truly beautiful window that will add an enormous amount of character to your home.

Gable

The gable window can bring the ultimate striking look to a home. Beautifully designed in symmetry and sightlines, an Origin Gable turns a home into a masterpiece.

It can be installed into even the shallowest of roof pitches, and the mullion sightlines can be aligned with door leaves below for a truly breath-taking architectural solution.

Colour shown: Red Brown - 8012M

Colour shown: Black Grey - 7021M

French

Beautiful to look through and easy to use, we are thrilled to now offer the Origin French Window.

Featuring the effortlessly elegant and entirely unique internal and external flush casement, the Origin French Window contains a moving mullion – so when you open both the left and right windows, there's no profile left in the way – just a completely unobstructed view of the outside world, making it a great choice for windows that need to meet egress requirements (emergency exits).

Colour shown: Hipca White - 9910M

Bi-folding

Adding a unique touch to your home, the Origin Bi-folding Window offers versatility and flexibility to your living area. Using the profile of our renowned bi-folding door system in either a 49mm or 72mm sightline, you have complete control over the size, colour and configuration to ensure that the window suits your everyday needs.

You can opt to have all of your windows folding and sliding in one direction or it can be specified with a split depending on your spatial requirements - the choice is yours.

Colour Shown: Light Silver Metallic - 9006M

Product displayed: OW-80 French
Colour shown: Dark Silver Metallic - 9007M

Product displayed: OB-72 Bi-fold
Colour shown: Anthracite Grey - 7016M

Configurations...

Origin Windows are configured to suit your personal preferences and space.

Your windows can comprise of any number of squares and can be made up of any type of opener, dummy sash or fixed frame.

With our casement windows, it means you can choose from top hung, side hung, fixed or a combination of these configurations to suit your desired look and function.

To make the decision slightly easier and for a bit of guidance, we've displayed some of the most popular configurations we manufacture.

Steel-style glazing options

Inspired by one of the world's most architecturally iconic neighbourhoods, the Soho Window brings a striking steel-style aesthetic to the Window Collection.

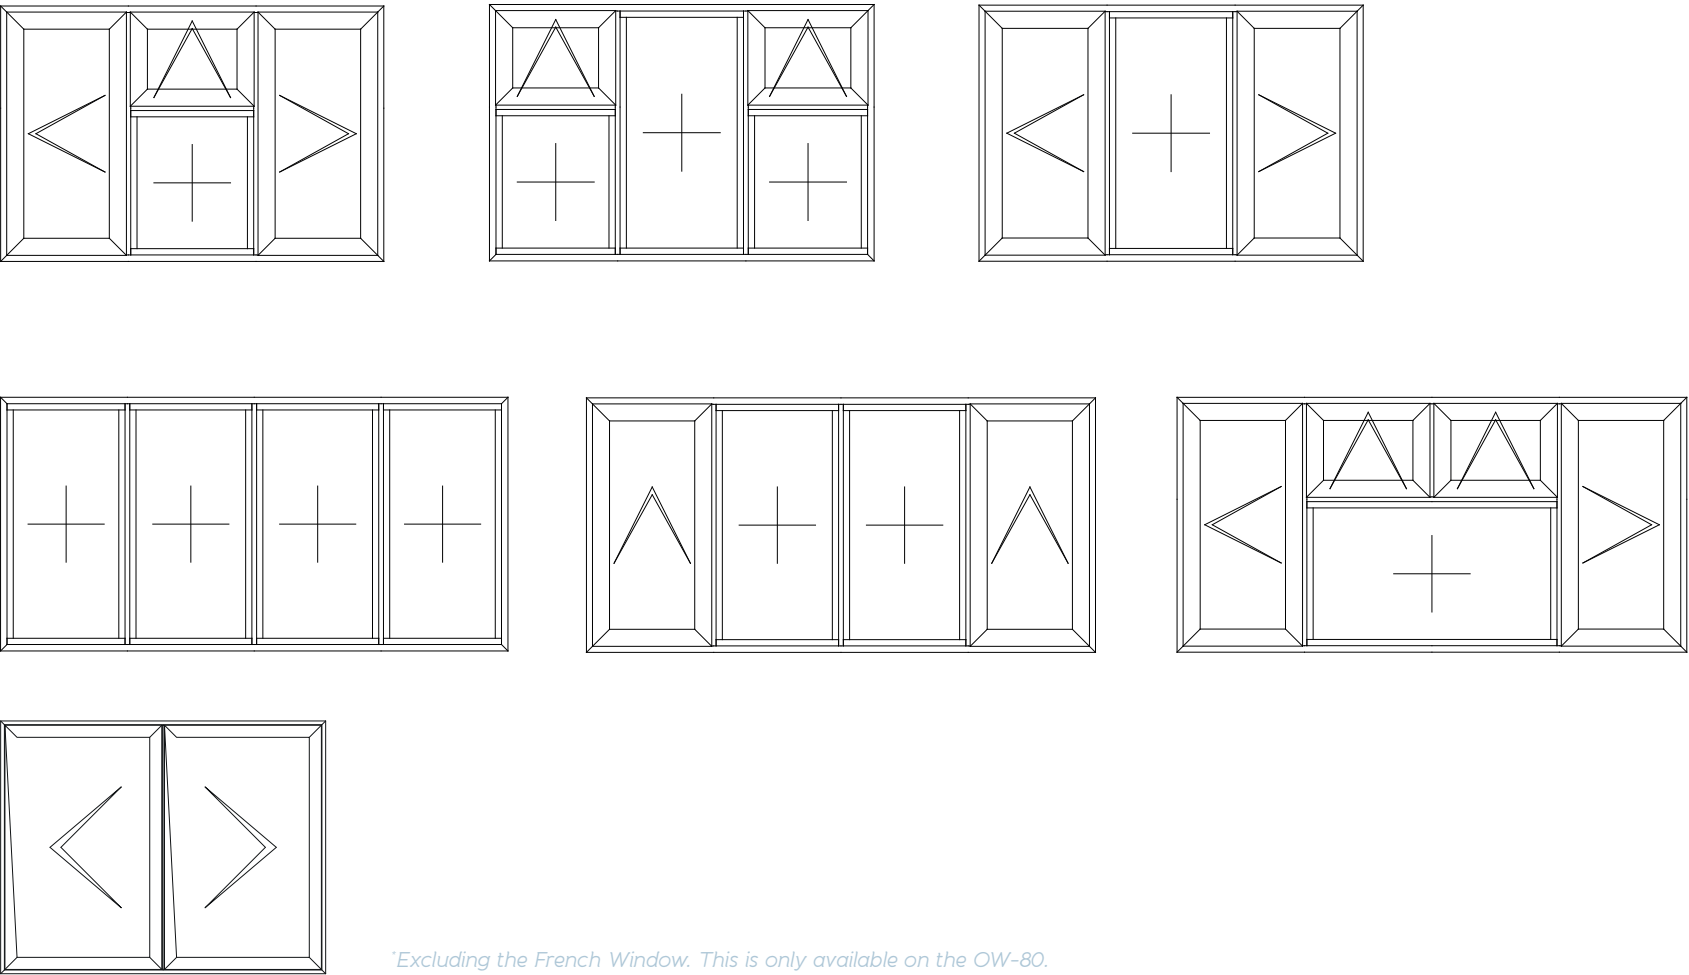

The OW-70 can be specified in a Soho style, where it will be manufactured with true glazing divides for an authentic and industrial appearance.

Should you prefer the OW-80 style, you can still achieve the steel-look design on this by specifying it with stick on glazing bars. These are expertly applied to the surface of the glass and can be arranged horizontally, vertically, or in a grid pattern to echo the steel-inspired design.

Product displayed: OW-80 Gable
Colour shown: Jet Black - 9005M

All popular configurations are available for both the OW-70 and OW-80 systems*

**Excluding the French Window. This is only available on the OW-80.*

Our accreditations...

At Origin, we pride ourselves on providing best quality products backed by best levels of service and efficiency. Put simply, our aim is to continuously learn, evolve and improve.

We are well known for having rigorously high standards in everything that we do. We're also known for innovation, but we never want to settle: if there's a way that we could do something better, we will find it.

This ethos has been instilled throughout Origin. Whether it's a process, product offering or even the company's sustainability, we have created a culture that encourages continuous improvement.

To demonstrate our commitment and as a way of measuring our performance, we work towards gaining certain prestigious accreditations. Our achievements show a strong moral and ethical intent in how we operate and how we try to do things the best way, not because we are told to do so, but because we think it is the right thing to do.

Here are some of the ways in which we continuously aspire and strive to be better.

ISO 9001 – Quality Management

ISO 9001 is an international standard that assesses a company's quality management system. Having first achieved it in 2013, the fact that we are still certified means that we have a track record of consistently providing products and services that meet both customer and regulatory requirements.

It's something that we take very seriously and its influence is integrated into every process. Key areas of this include:

Product quality – to ensure a product's overall manufacture is flawless, we have checks in place to guarantee you the best quality.

A few examples are:

- Supply chain – an inspection at the point of delivery and before going into manufacturing. If anything is spotted, it's documented and raised with the supplier.
- Production – there are quality checks at every station, not only to look over the previous person's work, but to review the quality of the overall build.
- Equipment – a robust maintenance schedule for machinery and equipment ensures consistency.
- Pre-delivery – before products are packaged and loaded ready for delivery, there's another thorough check to ensure nothing's happened whilst being moved from station to station.

Feedback – as part of our mission to always innovate, whether it's from internal or external stakeholders, feedback is imperative. We are very proactive at bringing this type of information back into the business and learning, as it gives us an opportunity to improve.

Training and development for our employees – meaning we're better at understanding the good, the bad, and what we can do better.

FS 584084

ISO 45001 – Health and Safety Management

Whether it's through improving homes with our products, or in our workplace, people are at the heart of everything that we do at Origin, so we are very proud to have achieved a triple badge accreditation when we received our latest accolade – ISO 45001.

ISO 45001 recognises our commitment to employee safety and reduction in workplace risks to create a better, safer working condition.

We have spent time reviewing all the activities that go on within the offices, manufacturing centres and warehouses, and have created a full risk log which will link up to our current risk assessments. These are fed back so they can be actioned to be rectified or developed into an improved method of operating.

We actively encourage our teams across the business to report any observations that they have so that we can continue to improve and ensure that safety at Origin is at the best standard possible, for everyone.

This means that you can buy from our range safe in the knowledge that we are minimising risks as much as we can for optimum safety.

OHS 711491

ISO 14001 – Environmental Management

Now more than ever, we need to be aware of the impact our operations may have on our environment; the legal obligations we must adhere to, and ensuring we are doing things the right way.

The internationally renowned ISO 14001 accreditation measures the environmental management system that we have in place. It's a subject that's very close to our hearts, which is why working towards this standard was an easy decision.

We care about the resources we use for our products – where they come from and where they end up. To add to this, we aim to be zero waste to landfill and have already put into place many positive changes to make this happen. We want our customers to buy from us with a clear conscience and feel that ISO 14001 can prove that Origin is taking responsibility, acting ethically, legally and exercising best practice in all that we do.

Our environmental management system covers:

- Waste management and energy targets – to reduce our consumption and impact on the environment. Helpful hints, tips and reminders are prompted to all staff regularly, so that they to their work practices can have a big impact.
- Product design and lifecycle – recyclability and sustainability are a design priority for us.
- Supply chain – choosing suppliers that are aligned with our ethos and vision. This is applicable not only when bringing on new suppliers, but also working with existing ones to better their carbon footprint – whether that's minimising packaging, reusing or even our drivers picking up the materials on their routes, rather than a supplier sending their own fleet, we are constantly reviewing how we can improve.

EMS 745310

BES 6001 – Responsible Sourcing in Construction

Also known as the BRE Environmental and Sustainability Standard, it is a framework that assesses the responsible sourcing construction products. Developed by the Building Research Establishment (BRE), it provides a robust methodology for evaluating the sustainability credentials of manufacturing materials and products.

BES 6001 focuses on three main pillars: social, environmental, and economic sustainability. It sets criteria for responsible sourcing practices, including the responsible sourcing of raw materials, ethical supply chain management, and environmental impact reduction throughout the product's lifecycle.

By achieving BES 6001 certification, we can demonstrate our commitment to sustainable practices and provide reassurance to customers and stakeholders. This standard encourages transparency, drives continuous improvement which is at the core our practices, and helps create more sustainable buildings and construction infrastructure.

Overall, BES 6001 plays a significant role for Origin in promoting sustainable development within the business by setting clear guidelines for responsible sourcing and encouraging the adoption of environmentally friendly practices.

Qualicoat

Qualicoat is a globally recognised accreditation for powdercoating. It certifies that our dedicated state-of-the-art facility meets and exceeds required levels, highlighting that our operations are ethical, and that we have a proven track record of delivering products that are of a consistently high standard.

Qualicoat covers key aspects such as corrosion and scratch resistance, coastal environment durability, and temperature tolerance. This ensures that the finish on our products is not only visually appealing, but is robust to handle the challenges of everyday use.

Our commitment to quality and innovation is reflected in our:

- Performance standard – providing lasting protection against weather, corrosion, and wear
- Finishing excellence – ensuring colour consistency, paint retention, and longevity

Qualicoat is more than a standard – it's a promise that the finish on every product we deliver meets the highest level of quality.

Secured by Design

Secured by Design (SBD) is a national, police-backed standard, associated with security and levels of performance for weather, operation and quality on domestic properties. The flagship UK police initiative was originally introduced to help 'design out' crime through the use of high-quality, innovative products and market-leading processes.

It recognises that our doors and windows have not only been tested to the required security standards, but that they also adhere to the rigorous test standards required by the police.

This independent certification involves initial testing of the products and regular re-tests, as well as inspections of our manufacturing and production facilities, to ensure the correct processes are maintained constantly over time, providing more secure and reliable products.

In order to be able to apply, we first needed to achieve:

1. PAS 24 (Enhanced Security)
2. BS EN 6375 Part 1 (Weathertightness)
3. BS EN 6375 Part 2 (Operational and Strength Characteristics)
4. BS EN 6375 Part 3 (Basic Security)
5. ISO 9001 (Quality Management)

We're proud to say that our products passed every one and SBD, so you can feel secure by choosing Origin.

Practical information...

Planning permission

Replacing the windows in your home doesn't usually require planning permission. However, there are exceptions to this rule. For example, if you live in a conservation area, are in a listed building or are drastically changing the window style, then planning permission may be required.

If new windows are part of an extension, then the extension plans should be discussed with your council from the early stages.

Contact your local council for information to see whether planning permission is required. In all circumstances, your chosen Origin Partner should be able to guide you through the process.

Glass and glazing

The Origin Premium Window is able to accommodate 28mm, 32mm or 44mm glass sizes which allow for double or triple glazing to be used, whilst the Origin Slimline Window can accommodate double and triple (28mm) glazing units.

Whether you choose annealed, toughened, tinted, patterned or any other type of glass, as long as it fits within these glazing standards, they will fit in the Origin Window collection.

Your selected Origin Partner will be able to guide you through the process of selecting the right glass for you. If you choose a third party to install your Origin Windows, they must ensure your needs are met.

The manufacturer

In the fenestration industry, the brand of the product is rarely the company that manufactures it. Quality can vary considerably between one manufacturer and another, and there is no guarantee that the windows produced are to the parent company's specification and quality standards.

Unlike the rest, Origin keep full control of the product from start to finish.

The next step...

Once you're set on turning your house into an Origin Home through the installation of award-winning doors and windows, visit origin-global.com to find your local Origin Partner and details of their showroom.

Whilst our nationwide network of Partners are independent companies from Origin, they have been offered training to ensure you receive the greatest quality product that's backed with a reliable and helpful service.

If instructed to by you, your Origin Partner or third party installer will be undertaking your installation, so they are best placed to discuss your building project and costs with.

Origin is the UK's leading manufacturer of aluminium architectural solutions.

Now award-winning and operating internationally, Origin began in 2002 as a family company dedicated to the design, creation and manufacture of the UK's best quality doors, backed by uncompromising levels of service.

Cousins, Neil Ginger and Victoria Brocklesby, have since worked relentlessly to perfect the design and functionality of bi-folding doors, and to create and maintain the highly respected reputation for quality and service that they have today, while expanding the range to include Internal Doors, Residential Doors, Sliding Doors and Windows.

As the business has continued to grow and diversify, the foundations of family ethos, pride and ownership in all stages of production firmly remain.
